Diabetes Prediction using Machine learning

Implemented different ML algorithms to predict whether the patient is diabetic or not and achieved the highest accuracy of 91.98% on testing data and 100% on training data.

Cricket Ticket Booking
Developed a simple ticket booking system for cricket matches by using C++ and implementing the OOPS concept.

I am unique because (Exceptional skills, talents, awards won, achievements, hobbies etc)

I have strong leadership skills and I have guided many teams in projects as well.

I have strong academic background.

I have been awarded Temenos Adopt IT scholarship.

Awarded cash prize for getting 94% in board exam in 2019.

Awarded the BOARD TOPPER in 2017 for securing 10 CGPA.

Self Analysis : Strengths & Development Areas

I considered myself as optimistic person. I generally take positives from any situation. I always try to learn from my failures and I strongly believe that failures make you a better person than success. I have positive mindset towards people and I like to interact with others and help them as well.

Coming to the areas of improvement I'm not very good at multitasking. I find it a little difficult to manage number of works at the same time but I'm working on it as it very crucial.

I will be a good hire because(Justify how you fit to Bounteous in line with your skills, talents, etc..)

I'm hardworking with never give up attitude and consistent in my academics over the years. I have strong technical knowledge in Data structures and algorithms, Object oriented programming concepts, Database Management System (MySQL), C++. I'm also very much interested in problem solving and I can grasp new concepts at a faster pace. I'm very flexible kind of person and I'm confident that my solid educational knowledge will provide your organization a productive employee.

Thank you.
